### About PainChek®

PainChek® Ltd is an Australian based company that develops pain assessment technologies. PainChek® is a smart phone based medical device using artificial intelligence and smart automation to identify and quantify pain and update medical records in the cloud in real-time. Firstly, PainChek® analyses in real-time images from a three second video capture for the presence of facial expressions indicative of pain and records those that are present. Next, the caregiver uses PainChek® to record their observations of other pain related behaviours that complete the assessment. Finally, PainChek® calculates an overall pain score and stores the result allowing the caregiver to monitor the effect of medication and treatment over time. PainChek® is being rolled out globally in two phases: first, PainChek® for adults who are unable to effectively verbalise their pain such as people with dementia, and second, PainChek® for Children who have not yet learnt to speak.

The PainChek® Shared Care Program is a PainChek® licensing model which enables a professional carer to share their resident or patient data securely with other healthcare professionals or designated homebased family carers for ongoing pain assessments or clinical data review.
